

HANDLING SYSTEM

APPLY LABEL PN

Flat carton handling system, complete with pneumatic labelling head suitable for the application of an identification label on the box, with its repositioning in the stacker device.

The packaging line provides an accumulation system for the flat boxes, placed in the correct position to be "sucked" by the Pick & Place device.

Thanks to the handling unit, the cardboard box is put under the labelling station for the application of a pre-printed label with barcode.

The labelling system is equipped with a device for detecting the label presence and sequential verification of the barcode.

At the end of the control phase, a second Pick & Place group recovers the labelled boxes to place them in the unstacker device for easy recover by the operator

Labelling unit with double product handling system.

Label size:	100 x 100 mm
Storage capacity:	150 boxes
Multi-format boxes :	from 200 x 300 up to 600 x 800
